Lime Instruments provides worldwide training for all levels from operators and supervisors to electronics technicians. A full test line allows customers time to run their own equipment on the platform they just learned.

- Lime Training can take place at our in-house training center, in the field, or via satellite worldwide
- Lime Test Line enables customers to tune and commission equipment before equipment gets to the field

LIME INSTRUMENTS

TRAINING & TESTING WORLDWIDE SUPPORT

Lime Instruments provides worldwide training for all levels from operators and supervisors to electronics technicians. A full test line allows customers time to run their own equipment on the platform they just learned.

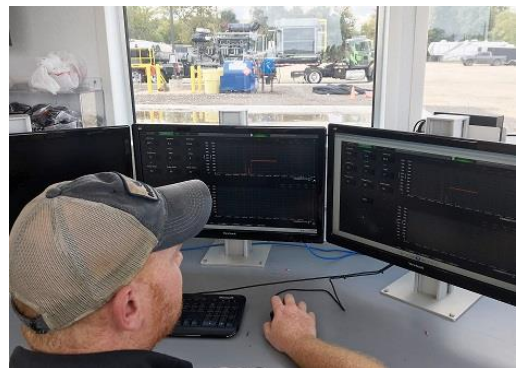

CUSTOM TRAINING

- Training classes are completely customized for the participant's skill level and job requirements
- Classes taught at Lime or via interactive online videos organized by topic
- Field training available worldwide
- Class sizes vary depending on customer requirements

Equipment Testing – Test Line

- Full test line capable of testing pumps, blenders, hydrators, chem adds, etc.
- Test can be completed from actual unit, van, or inside Lime's control room
- Enables customers to tune and commission equipment before going to the field
- Gives new operators a chance to learn on their equipment before arriving at the job location
