Lime Instruments provides worldwide training for all our customers; from operators, supervisors, and electronics technicians. A full test line allows customers time to function test their own equipment on the platform they learned.

- Lime Training can take place at our in-house training center, in the field, or via satellite worldwide
- Lime Test Line enables customers to tune and commission equipment before the equipment gets to the field

LIME INSTRUMENTS

HIGH PRESSURE TEST LINE & PERSONNEL TRAINING

Lime Instruments provides worldwide training for all our customers; from operators, supervisors, and electronics technicians. A full test line allows customers time to run their own equipment and apply the training they learned.

EQUIPMENT FUNCTION TESTING

- Full test line capable of testing frac pumps, blenders, hydrators, chem adds, etc.
- Test can be operated from unit, data van, or inside Lime's control room
- Enables customers to tune and commission equipment before going to the field
- Gives new operators a chance to learn on their equipment before arriving at the job location
- Test Line capabilities:
 - (1) In-line flow meter on suction manifold
 - (2) 3" 15K PSI Expro chokes
 - (2) Boost pumps (8x6x14) connected to (3) 4" discharge connections
 - (2) 17.5K gallon tanks with 16" & 12" crossovers
 - (1) Water treatment system

PERSONNEL TRAINING

- Training classes are customized for the participant's skill level and job requirements
- Classes taught at Lime in the training center
- Field training available worldwide
- Class sizes vary depending on customer requirements
